OBJECTIVE

To leverage 2 years of experience as a Software Developer in building high-quality software solutions, specializing in Fleet Management software support, client handling, and technical documentation, while contributing to innovative projects in a dynamic organization.

PROFESSIONAL EXPERIENCE

Software Developer

Jan 2023 – Present

Softcruise Technologies, Agra, India

- Designed and developed web and mobile frontends using JavaScript and React Native.
- Enhanced TrackingHAWK software with new features, including real-time vehicle monitoring, fleet tracking, and status charts.
- Provided client support for Fleet Management software, assisting with troubleshooting and implementation.
- Managed end-to-end software documentation, creating user manuals and system guides for better client understanding.
- Represented the company at major tech exhibitions, including **GITEX GLOBAL Dubai 2024**, demonstrating software capabilities and engaging with clients for business expansion.
- Delivered technical consulting for product support and guided customers in software adoption.
- Conducted pre-sales discussions, product demonstrations, and customer onboarding.
